

About Cellution® treatment :

Duration of the session

A Cellution® session lasts on average up to 1 hour.

Resumed activities

There is no downtime required with the Cellution® treatment as it is a non-invasive method. Therefore, you can get back to business as soon as the session is over.

Cellution® treatment

Cellution® is a safe, non-invasive, and painless treatment. Slight redness or bruising may appear. These effects disappear naturally in the hours or days following the session. There is no required downtime.

Number of required sessions

Results vary from patient to patient, however it usually takes 6 to 10 sessions to obtain an optimal result.

Visible and permanent results

The skin aspect is improved thanks to the reduction of the volume of fat cells, neocollagenesis and lymphatic drainage. Therefore, the result obtained is final.

To make your results last and take care of your new silhouette, keeping a balanced diet and maintaining regular physical activity is necessary.

The Ultimate Technology
for Cellulite Treatment.

cellution.

BY DELEO

The famous "orange peel aspect" is the hallmark of cellulite, which is the result of a complex and multifactorial process. Adipocytes or fat cells, as well as the connective tissues under the skin, known as "septa", undergo changes that visually result in alterations in the appearance and texture of the skin.

Although cellulite can also affect men, it settles in 90% of women due to the differences in fat distribution and estrogen levels.

The fusion of 4 technologies

ACTIVATE

The HIFD™ technology stimulates the release of fats while triggering the production of collagen and elastin. Combined with dermocosmeceutic active ingredients, this synergy optimizes the transmission of active ingredients with anti-cellulite properties, which are regenerating and moisturizing.

DRAIN

Lymphatic drainage and destruction of fibrous septums thanks to the mechanic massage.

STIMULATE

Use of vibrational waves that emit vibration impulses, which are specially calibrated, to boost microcirculation in the cellulite tissue and to reduce water retention.

Cellution® embodies the know-how and the combination of the most effective and scientifically proven technologies for:

- Cellulite
- Skin Tightening
- Lymphatic drainage
- Slim down the silhouette

NON-INVASIVE
AND PAINLESS
